

1. Create server-api folder
2. In Terminal ,Into server-api, npm init –yes
3. Then npm i –save json-server

```
api > { } db.json > [ ] contacts
{
  "contacts": [
    {
      "id": "c4be475a-ef49-47d2-a75f-4e8f8d6b9292",
      "name": "Nikesh",
      "email": "Nicks@gmail.com"
    },
    {
      "id": "d092f095-65f1-42ba-bb09-2cd90322a3bc",
      "name": "Max",
      "email": "dipe@gmail.com"
    }
  ]
}
```

```
{
  "name": "server-api",
  "version": "1.0.0",
  "description": "",
  "main": "index.js",
  > Debug
  "scripts": {
    "start": "json-server -p 3006 -w db.json"
  },
  "keywords": [],
  "author": "",
  "license": "ISC",
  "dependencies": {
    "json-server": "^0.16.3"
  }
}
```

```
PS C:\Users\dipesh.malvia\Desktop\ReactBasics\server-api> npm start
```

```
"scripts": {
  "start": "json-server -p 3006 -w db.json"
},
```
